

# Confined Spaces

## Key Takeaways:

- Recognizing characteristics and examples of a confined space.
- Evaluating hazards of confined spaces.
- Understanding the differences between permit-required and non-permit-required confined spaces.
- Comprehending the basic requirements of a permit-required confined space program.

## Course Description

The purpose of this course is to educate all general industry employees about the existence of confined spaces, the type of hazardous conditions that can be present and the basic requirements for entry into permit-required confined spaces.
